

## USER EVALUATION TEST - TASKS

**Required language:** English (B2 or above)

**Required equipment:**

- Personal computer (laptop or desktop)
- Wired headphones or earphones

**Required software:**

- A modern web browser (Firefox recommended)

**Estimated time to complete:** 30–40 minutes

### General instructions

- There is **no strict time limit**, but please try to complete all tasks in **one uninterrupted session**.
- Please sit in a **quiet environment** to avoid background noise in your recordings.
- If you **cannot complete a task** (because of technical problems or misunderstandings), just do what you can and **explain what happened later in the survey**.
- Please **follow the tasks in order** and **use the same device** for all tasks.

## TASK 1 – Collaborate in an existing collection and composition

You are invited to collaborate on the **Happy Birthday collection** by recording **two renditions**.

1. You need to **register in the system** (<https://hiaudio.fr>) with the **same email address** you applied to the user evaluation test participation form
2. Once you are logged in you will see an existing composition where you can **record yourself singing** the typical celebration **song from your own country**
3. You need to do the **manual annotation of the track** specifying the language
4. **Change the title of the composition** with proper reference of the country or language
5. Navigate to one of the **Happy Birthday subcollections** (<https://hiaudio.fr/index.html?collectionid=n5hoJCqxToAMAtKwFgBide>) , **decide whether if you want to play an instrument or sing** and **choose the appropriate template** for it
6. **Clone the template** in order to create a new version.
7. **Estimate the latency** (take a **screenshot** of the value)
8. **Sing or play** an instrument on top of the existing tracks. You can choose the language you want in case you sing. You need to use the **full time of the track**, which means repeat twice.

## TASK 2 – Create your own collection and composition

Create from scratch a **new collection and a new composition inside of it**. You can create as many as you want.

- You can **use the metronome built-in feature from the platform to record** yourself (if you know how to use it) **or upload a guide track** of a song to perform on top of it **[see NOTE]** . You don't need to record a whole song, **around 30 seconds** is enough.
- **If you don't use the metronome**, the resulting composition should have **at least 2 tracks**. The **first track is the guide** or reference to allow recording on top of it. **If you use the metronome, take note of the time signature and BPM values**, you'll be asked later, please.
- **Invite [hiaudioparis@gmail.com](mailto:hiaudioparis@gmail.com)** as a contributor to all compositions that you create.

### NOTE

If you lack of ideas, or are not able to create a new composition using a guide track, here are some other proposals:

- 1) In a new composition record the same track twice (whatever the song you like), i.e. double the voice or play a melody/rhythm with the instrument two times in different tracks one after the other
- 2) Extend *Au clair de la lune* Collection by cloning a template:
